

The 13th Ilan Ramon International

SPACE CONFERENCE

Join us for a unique panel led by incredible, international astronauts

EARTH FROM SPACE: INTERACTIVE ASTRONAUTS PANEL

January 29th 2018, 17:30-19:00, Smolarz Auditorium, Tel Aviv University

The 13th Ilan Ramon International Space Conference is even bigger than prior years due to an exciting collaboration between the Israel Space Agency at the Ministry of Science and Technology and the Yuval Ne'eman Workshop for Science, Technology and Security. This year's conference provides interaction with international prominent leaders in the space field, the Israeli space community, military personalities, and more. The theme is "Remote Sensing in the New Era" and we couldn't be more thrilled to host this two day event!

We are excited to host a unique panel led by the incredible astronauts attending the conference. "Earth from Space: Interactive Astronauts Panel" will take place on the first day of the Ilan Ramon International Space Conference. This special event will last an hour and a half and is open for all those who register. We look forward to welcoming these astronauts for an insightful and engaging interactive panel discussion.
